So if you need some custom scan symbols or technical indicators, you'll be able to create them with Keymacro. Keymacro Features: - Fully multithreaded - Can scan multiple symbols at 1d6a3396d6

N Financial Reader Full Version

KEYMACRO is a powerful, but easy-to-use Macro recorder for Microsoft Windows which lets you record multiple keystrokes, mouse clicks and other actions you perform on your computer. It can record the actions of other programs or open files, edit files, create new files and even automate tasks. In addition, you can use it to compare the results of recording with real-time actions performed on your computer. Create a macro recording You can create macros either when you're using a program or open a file. When you start the recording, the program or the file will be paused. Press any key combination (such as Ctrl + O) on your keyboard to start recording, then perform the actions you need. To stop the recording, press any key on your keyboard. Compare recording results When you record your actions, KEYMACRO compares the recorded results with the real-time results to be sure the recording was accurate. You can view the comparison results in the right pane of the recording window. Macro recording allows you to record and compare your actions on your computer. Records mouse clicks You can use it to record mouse clicks or drag and drop actions of other programs. It can create macros for Microsoft Word, Excel, Outlook and other programs. If you use Microsoft Outlook, you can use it to record actions with the toolbar and buttons on your screen. High-speed recording When you record, KEYMACRO records all the actions you perform on your computer. It is convenient and will save you a lot of time if you want to compare the results of your work. You can also use the high-speed recording to rapidly generate a series of actions or to control a program to help you perform some repetitive tasks. Use the context menu to create macros When you press any key combination on your keyboard, a context menu will appear in the recording area. You can select any option you want from the context menu to use it as a macro. Automate tasks KEYMACRO can also automate the execution of tasks that need to be performed on your computer. You can add a task to your list of macros and create a custom menu to launch the task. You can even use it to set up a task that automatically restarts your computer in case it goes off. It can automatically print the files you open in Microsoft Word. It can also create task lists and play specific sounds and music as you perform your work. KEYMACRO is a powerful and easy-to-use
