Mahabharata / Mahabharata (1969) - watch online. I am currently writing an application that queries a table and I am using SqlDataReader in sql to get the data. After using ssis and sqlite, I would like to create a database with a name containing only the project number. I looked at SQLite but couldn't find a way to do it. What I need to do is create a CSV file in SQLite and use it to create a database in mssql. I tried using sqlite3_open, sqlite3_exec, sqlite3_dump_file etc but it didn't work.
