mpps ecu v12 tuner programming tools mppps v12 chip tuner mppps v12 and mpps v12 free download mppps v12 not working I have received a strange request to change a tune on my 2005 1.8T. I have downloaded the ECU chip-programming tools so I know how to load the software into the scan tool that is attached to my OBD II system. I'm not really sure what. I would need to know what software I need to have downloaded and how to install it. It would also need to be something free. My car is in the shop at the moment and I have to remove the top of the car to perform the necessary work. mppps v12 free download mppps v12 car tuner mppps v12 download mppps v12 software mppps v12 software for pc mppps v12 software rr dl mppps v12 tuner app mppps v12 tuner for rfid mppps v12 tuner for wifi mppps v12 tuner free mppps v12 tuner perth mppps v12 tuner out of stock mppps v12 tuningQ: Counting the number of repeating values in a string I am trying to count the number of repeating values in a string. For example, the following string: \$string = "Random text,Random text,Random text,Random text,Random text,Random text,Random text,Random text,Random text"; Expected Result: 2 Actual Result: 7 What is wrong with my method of counting? Here is my method: public static function countRepeating(\$string) { //Make an array of the string using explode(); \$array = explode(\$string); //Define an empty array to store the frequency \$frequency = array(); //Loop through the array; foreach(\$array as \$value){ //Check for existing values in the frequency array if(array_key_exists(\$value, \$frequency)){ //Increment the frequency for the value \$frequency[

Q: Android Studio Trunk build error when connecting library module as library I'm trying to connect a third party library module within my android studio project. I've made the library module as a library, and the library module as a module. When attempting to build the project, the build process fails with the following error: Execution failed for task ':app:transformClassesWithInstantRunForLibrary'.
java.lang.IllegalArgumentException: Error creating class loader for TiledMapAsset.class Does anyone know what this error means and how to fix this? Here's an image of the build error: A: I found the solution to the above build error. Seems like my library module didn't have a file called "build.gradle" in the module's directory. Adding the build.gradle file to the root module's dir fixed the issue for me
