HdrpA.Q: How can I store data from request to response in a Node.js Backend Is there a way to store data from request to response to model in a Backend Service that is hosted in the cloud? A simple example would be like this: var express = require("express"); var app = express(); var request = require("request"); var serializer = require("./serializers"); app.use(express.urlencoded({ extended: false})); app.use(express.json()); app.get("/", function(req, res) { var payload = {name: "Robot", hour: "23"}; console.log(payload); // I would like to store data from this to back end // Moustache serializer.JSONSerializer.serialize(payload, function(err, doc) { if (err) throw err; res.send(doc); console.log(doc); // Error or empty }); }); var port = process.env.PORT || 3000; app.listen(port, function() { console.log("App is running,
