
Gerber Accumark Ver 8.5.0.108 (Pro)

The MultiCam Z-Stitch is a simple stitch created to function as a toggle on the z-axis in Accumark software. Rather than have horizontal stitching, like so many of the other stitches, the goal is to flip the fabric over on itself, then stitch. When done, you have a piece of fabric that can be turned right side out. Be aware that this is not a true puff stitch, as it is symmetrical only on the x-axis. The stitching moves vertically and horizontally as it progresses. The Xygen Graphic Layout Editor is used to design "fixed" patterns in accumark software. (Fixed patterns are those that will be used for garment development, and will either be used for fabric production or assembly) This tool will be used in addition to the graphic automation software it is designed to work with. The Xygen Graphic Utility is used to "create" graphics that will be used for garment development. It is the second piece of graphic automation software used in conjunction with the graphic layout editor. This tool is used to create what the layugener will look like when finished in Accumark software. In order to do this, it will be necessary to know the layugener's x, y, width and height. Please do not start the process without these values. Gerber Accumark is a leading provider of Gerber pattern making, measurement, and appending software. With over 25 years of experience and knowledge, we are trusted by hundreds of thousands of worldwide customers. Our software enables customers to automate the design, printing, and assembly of many different kinds of patterns. Gerber AccuNest is the best nesting software available.

Gerber Accumark Ver 8.5.0.108 (Pro)

AccuMark Made-to-Measure is the world's leading provider of custom pattern making, measurement, and appending software. With over 25 years of experience and knowledge, we are trusted by hundreds of thousands of worldwide customers. Our products are innovative, high-performance tools that automate the design, printing, and assembly of garments. Gerber AccuMark Made-to-Measure solutions include: manufacturing of protective or non-protective surface patterns, and both custom patterns or production patterns for garments, shirts, coats and accessories. We are a world-leading supplier of pattern making, measurement, and appending software. We know that customers want the fastest and most accurate order tracking, communications, and nesting in the industry. As a result, AccuMark is consistently ranked in the TOP 25 Software and TOP 3 Software Vendors. The AccuMark Made-to-Measure In-House Call Center and remote service delivery support are state of the art, cutting edge, customer focused solutions that are providing superior support for our customers worldwide. AccuMark products are trusted tools that help customers automate the design, printing, and assembly of garments and accessories. Our products have been adopted by hundreds of thousands of end users in almost every corner of the world. AccuMark companies have been innovating for over 25 years and continue to improve and improve the product to provide the greatest feature set for their customer base. AccuMark is the world's leading supplier of Gerber patterns. The next generation of digital patternmaking technology, AccuMark 2D empowers digital patternmakers to significantly reduce the amount of physical samples that need to be created by taking advantage of 3D imaging to enhance fit. Using Adobe Illustrator, AccuMark 2D enables users to effectively visualize their ideas before they are applied to their garment. Once the design is created, AccuMark 2D automatically saves and shares the 2D pattern, and enables the user to transfer and export the 2D pattern to a Gerber pattern file. 5ec8ef588b
