
Unlocker 1.9.5 Portable.

Problem: When booting with the WinPE Rescue CD created by the Macrium Reflect software, the My Passport drive is not visible as its Password protected. I have found no way to unlock the drive via the WinPE Rescue CDs file manager. The WD Unlocker icon shows up as a CD-Drive, but, does not work. Neither does the WD Security software, which could also unlock the drive under normal circumstances. IObit Uninstaller Pro is the premium version of IObit Uninstaller, the world's most powerful and trusted uninstaller. This program can make your computer absolutely silent and completely clean. You can uninstall your programs like unlocker, microsoft office, 1click installer, printer and other popular applications. It is a wonderful all-in-one tool that helps remove any unwanted apps from your computer. Uninstall your programs, windows, and web browsers in a single click. Unlocker makes you more productive. Why do you have to use several applications to unlock and unlock files and folders, instead of one? You can unlock files, folders, and entire folders without the need to use other applications. All the operations and functions can be done with just a click of a mouse. Just download and install the program to experience the simplicity and ease of use. Similar to how a normal key is used to unlock a safe, a key unlocking file is used to unlock a safe which contains sensitive data. In the same way a file encrypted with a file encryption software will become unlocked once an unlocker software is installed. If you're using a laptop, you can easily store your files and folders with confidence. You can install the Unlocker portable on your laptop and keep your encrypted files. There's no need to worry about storing the files on your PC.

Unlocker 1.9.5 Portable.

A few changes... I found that the small changes to the eSpeak API got rid of the (non-portable) "security mechanism" for automatically unlocking. However, eBay's (as yet unconfirmed) handler does add an extra 2-5 seconds to the unlocking process, so if it's your only option, you may want to manually add a command to unlock the program yourself... This code is from the old version 1.9.2, from 2020-11-01: 5ec8ef588b
