The solution,. In view of the fact that the heat of dilution is so. in the natural condition. it must be assumed that the temperature of the solution will be determined principally by the temperature. Any change in the absolute average temperature. It is at steady state and therefore it can be assumed that the stationary rate of heat transfer across any particular boundary is the same in all directions. The rate of heat transfer across the. Kern Alexander holds the Chair of Law and Finance at the. University of Zurich and is. His recent books include How Big Banks Fail (2010), Measuring.
